1st Annual UW-Madison Diabetes Research Day

Tuesday, February 19th, 2019
8am-1pm

REGISTER NOW!
Health Sciences Learning Center

This exciting symposium will promote diabetes research across campus and introduce the Diabetes Research Accelerator for Wisconsin (DRAW) biobank and database, a new resource recently funded by the Wisconsin Alumni Research Foundation’s UW2020 Initiative to support diabetes research.

The event will kick off with a plenary presentation by Dr. Alvin Powers, Director of the Vanderbilt Diabetes Center and Chief of the Division of Diabetes, Endocrinology, and Metabolism at Vanderbilt University. Dr. Powers’ research on type 1 and type 2 diabetes focuses on pancreatic islet biology, development, and function.

A Research Showcase follows, with the goal of facilitating new connections and collaborations across the UW-Madison diabetes research community. Principal investigators and their teams will share short descriptions of their diabetes-related research programs. The day will wrap up with a poster session in the Health Sciences Learning Center Atrium.

If you are interested in registering or presenting during the poster session, please submit an abstract at https://go.wisc.edu/zgug31 by February 1, 2019.

Breakfast and lunch will be provided!

For any questions, please contact our research team at diabetesresearchbiobank@wisc.edu.

UW Diabetes Research Day made possible thanks to generous support from the UW Madison Department of Medicine, Division of Endocrinology, Diabetes, and Metabolism; the UW Madison Integrated Program in Endocrinology (iPEND); the UW School of Medicine and Public Health Dean’s Office; the Morgridge Institute for Research; the UW Institute for Clinical and Translational Research (ICTR), and the UW Madison Office of the Vice Chancellor for Research and Graduate Education with funding from the Wisconsin Alumni Research Foundation for the UW2020 initiative.
